

# Is your Profit going through the Roof?

Let Porter Insulation restore your poultry farm back to profitability.

**Call Porter Insulation today at 800-999-0430.**

*Since 1965, the South's Leading Poultry House Insulation Company.*

## *Listen to what Grower's around the Southeast are saying....*

### Larry Page of Kenton, Tennessee

"Porter blew new insulation in the attics of all 6 of my houses and I was well pleased with the professional way they dropped their trailers, didn't waste time and cleaned up. **The difference between my gas usage and other growers in my complex is simply amazing.** In my opinion, it is much more important to make sure you seal your ceilings than it is to add all of the new bells and whistles on the market."

### Johnny Wright of Winder, Georgia

"Porter came in and did a complete Energy Retrofit on all of my houses. They re-blew my ceilings, insulated my sidewalls and strapped down my curtains from the outside. The difference was astounding. **I saved over 40% on propane alone and paid for the entire job in just 2 batches of chickens.**"

### Joe Sims of Temple, Georgia

"Before Porter added the new insulation in my attics, I had hot and cold spots throughout my houses. The houses now heat and cool evenly. **I typically save at least 200 gallons of gas per flock** and the houses are a lot cooler in the Summer."

### Dennis Maze of Horton, Alabama

"I had Porter enclose my sidewalls with fiberglass rolls, OSB and Tri-ply. The first thing I noticed was much better air flow and air speed throughout the houses. My static pressure improved dramatically as did my power and gas usage. The new insulation also dramatically improved my moisture problems which is evidenced by my floors being dry now. **The insulation helps in so many ways more than just saving gas.**"

### Stanley Pullen of Bowden, Georgia:

"I had Porter blow additional insulation in the attics of all 7 of my houses. I originally only wanted them to blow the 3 worst houses, but I immediately noticed that there was a **12 degree difference** in the first day after Porter had blown the new insulation. I called Brantley and told him that I could not afford not to re-blow the other 4 houses."

### Darrell Chaisson of Arcade, Georgia

"I used Porter to insulate my sidewalls in my older houses and **paid for the entire job in only 3 batches of chickens.** The houses are much easier to heat and cool now. I also love the way that the slick sidewalls make the air flow easier and increase the wind speed. **I could not imagine how much money I would have spent this past Winter if I had not enclosed the sides.**"

### Greg Almond of Woodland, Alabama

"**I saved over \$10,000 in the first year** after enclosing my sidewalls with fiberglass and OSB. It took me a year and a half to get my money back. I also have a much more structurally durable house than the foam would have provided."

### Steve Miller of Lexington, South Carolina

"I saved 30% on propane in addition to my Summer savings. I also went from the 50<sup>th</sup> percentile of growers to the **Top 15 per cent in just 1 year** after retrofitting my houses."
